

How to disinfect fishing equipment?

Fishing equipment, boats and other items that have been used in the river have to be **disinfected before** being transported to other rivers or other parts of the same river!

Disinfection with Virkon® S

1. Remove surface water from items → drain out, shake off, wipe dry, and so on
2. Check that bins and buckets contain ready to use Virkon® S solution which should be **bright pink**
3. Put into the tube:
 - Fishing rod
 - Landing net
4. Put into the blue feed bucket:
 - Fishing reel
 - Lures like spoons, spinners, wobblers and flies
 - Lead weights
 - Leaders and tips
 - Lure and fly boxes
 - Other small items (scissors, nail clippers, and so on)
5. Put into the black trough:
 - Waders
 - Wading boots
 - Wading shoes
6. Time of exposure for all items: **15 minutes**
7. If desired wash items in clean water afterwards (**not in the river!**)
